Пояснительная записка

Примерный фонд оценочных средств (далее – ФОС) по общеобразовательной дисциплине «Иностранный язык» разработан на основе требований ФГОС СОО, с учетом профессиональной направленности программ среднего профессионального образования, реализуемых на базе основного общего образования.

Основная цель создания примерного фонда оценочных – унификация и стандартизация требований к результатам обучения студентов по следующим направлениям подготовки: «естественно-научный», «технологический», «социально-экономический» и «гуманитарный» и совершенствование содержания общеобразовательной дисциплины для формирования умений и знаний.

Профессиональный компонент ФОС отражен в заданиях на перевод и носит научно-популярный характер и может быть применен и использован для тестирования студентов по всем УГПС.

The famous Trans-Siberian railway line goes from Moscow to Vladivostok, but there's another railway line about 650 kilometres north of the Trans-Siberian. This is the Baikal-Amur Mainline (BAM). A special train, the *Matvei Mudrov* medical train, travels along its 4,000 kilometres. There are usually between twelve and fifteen doctors on the train. The train stops for a day at places along the BAM. The people who live in small towns and villages come to the train for medical attention. There are no doctors or hospitals in their towns or villages. For these patients, their health centre is on the train.

The *Matvei Mudrov* was named after a Russian doctor in the nineteenth century. Nowadays, the *Matvei Mudrov* visits each town or village on the BAM twice a year. In the village of Khani (population 742), the patients include a man with two broken ankles and a teenage girl. She had appendicitis a month ago and she was lucky to travel to a town three hours away for an operation. The *Matvei Mudrov* doesn't have any equipment to do operations. The doctors can diagnose their patients' medical problems and recommend treatment and medicines. The train has a laboratory for blood and urine tests and a number of medical testing machines. The patients like the doctors on the train. They say they are honest and good at their jobs.

Next stop is a town called Berkakit. About 4,000 people live here. There is a queue to see the doctors. Mikhail Zdanovich is waiting for his turn. He's 61 years old and he came to Berkakit in 1976. At the time, only about a hundred young people lived in Berkakit. It was a new town. Zdanovich met a woman who worked at the town bakery. They married and stayed in the town. When Zdanovich walks into the doctor's office she says 'Oh, Mikhail, I recognised your voice.' He has a problem in his shoulder. The doctor writes a letter to say that he can't work, he must have an operation. He leaves, happy, and then he returns a few minutes later. He brings freshly cooked pies and some goat's milk.

For the people who live in this remote part of Russia, the *Matvei Mudrov* is more than a medical train. It's a social connection to the community of their country.

19 What is the BAM?

- a) a part of the Trans-Siberian railway

Read the text. Put the events below in order.

Heat, cold, mountains, deserts, illness, and animals. All of these were possible dangers when Nick Bourne decided to run from one end of Africa to the other - a journey that many people thought was impossible.

Bourne began his run in northern Egypt in October 1997. His adventure nearly ended 500 miles later while he was waiting to cross the Sudanese border - the Egyptian military stopped him and refused to let him leave the country.

Eventually, he flew to Cape Town and started again on 21 January 1998. Every day he got up at 3.30 a m., ate a breakfast of cereal, and started running. After 20 miles he stopped for a rest and had a pasta lunch, before running another 20 miles. He drank up to 15 litres of liquid a day.

He had some incredible experiences. He was crossing the Kalahari Desert in temperatures

of 62°C when he came face to face with a giant cobra. In Zambia his heartbeat went up from 135 a minute to over 190, and his doctor found that he had malaria. He saw lions and ran through a herd of elephants, and a swarm of bees attacked him while he was running through Tanzania. He celebrated his 28th birthday with a chocolate cake in the shadow of Kilimanjaro.

After eleven months and 6,021 miles he arrived at the Pyramids and finished perhaps the most amazing run ever.

The Hub

Sometimes, you fly not to your destination, but to a 'hub'. In other words, you fly to an airport to catch a plane to fly to another airport. You are in transit. You sit in a big room where all the seats are facing in the same direction, like the seats in a theatre. But there is no show. There is nothing.

You begin to feel ill. You do not know what time it is. In many airports, each terminal is the same as every other terminal. The corridors are the same as each other. But gate 36 may be hundreds of metres from gate 35, in any direction; it's easy to make a mistake.

I was once at Zurich airport. The weather was bad and the plane was delayed. I was drinking coffee at a bar and reading a book. Outside, the weather had got worse. Time passed. When the flight was called, I picked up my bags and moved towards the gate. I went down a corridor, down some steps, along a bit, down a bit. Then, just as I got to the gate, I realized I had left my book in the bar.

I tried to remember the route I had taken so I could do it in reverse. I was successful. The book was still there.

Then I started running back. I ran down staircases, along corridors. I ran past a shop selling magazines. At some point, I knew that I had taken the wrong turn. At another point, I panicked.

11. You land at a 'hub' to catch another plane.
12. It is easy to go to the wrong gate.
13. The man realized he had forgotten his book when he got on the plane.
14. When he went back, he couldn't find the book.

15. He got lost in the airport.

Task 1. Put the article *the* in front of the geographical names on the map where it is necessary.

The United Kingdom of Great Britain and Northern Ireland

Task 2. Read the text below and fill the spaces in the table with the information from the text.

The Yeoman Warders were formed by King Henry VIII. In 1509 the King decided to leave twelve of his old and sick Yeomen of the Guard in the Tower of London to protect it. Their main duty was to look after the Tower prisoners, and safeguard the British crown jewels.

Nowadays there are still twelve Yeomen Warders at work every day. (All in all, there are 35 of them). They are still nicknamed “Beefeaters” but their duties have certainly changed. They act as tour guides and raven-keepers. They carefully look after the famous ravens, feed them and cut their wings. There is a legend that the Tower will fall if the ravens fly away. The Beefeater’s

most famous duty is to take part in the night ceremony of passing the Tower Keys. For everyday duties Yeomen Warders wear a red and dark blue uniform with a round hat, while on holidays they wear a state dress uniform which is red and gold, the same as the Yeomen of the Guard, but without a cross belt. In these uniforms the Beefeaters can be called one of the most interesting sights of London.

The historical center of London is now a relatively small area still known as the City, which covers only about 1 sq mile. Most of the financial activities are crowded along Threadneedle Street, near the intersection known as the Bank, which includes the huge Bank of England complex, the Royal Exchange, and the Stock Exchange. The permanent residential population of the City is now less than 6000, but about 350,000 commute here daily to work.

B.

Located just west of Soho and Covent Garden in the West End is a more residential area. The relatively dense development of this area is broken up by a series of Royal Parks, areas once owned by the Crown, including Hyde Park, Kensington Gardens, and Regent's Park.

C.

The most prominent landmark of the City is Saint Paul's Cathedral, designed by the English architect Christopher Wren to replace the original church, which was destroyed during the Great Fire of London in 1666.

D.

Some of the City's traditional functions have disappeared. The newspaper industry was concentrated in the Fleet Street area for centuries, but during the 1980s the Times and other papers moved to highly automated quarters at the Docklands in the East End. The old wholesale fish market, Billingsgate, located for centuries on the river between the Tower and London Bridge, also moved to the Docklands.

E.

The City of Westminster, about two miles upstream from the city of London, emerged as England's political and religious centre of power after the 11th century. At the heart of Westminster is Westminster Abbey, begun by Edward the Confessor in the 11th century and rebuilt in the 13th century. It has always been closely associated with the monarchy and is used for such state occasions as coronations and royal funerals. It is also a giant mausoleum, and more than 3000 notable people are buried there. Statues and monuments line the magnificent nave.

F.

Virtually across the street are the Houses of Parliament, officially called the New Palace of Westminster. Farther west is the monarch's permanent residence in London, Buckingham Palace.

G.

To the west and north of Trafalgar Square is the West End, which is usually regarded as the centre of town because it is London's shopping and entertainment hub. The busiest shopping area is Oxford Street, where such large department stores as Selfridges, John Lewis, and Marks and Spencer are located. Other well-known shopping areas include Knightsbridge, the location of Harrods department store; and Piccadilly, where Fortnum and Mason specializes in fine food.

ANSWER KEY

Task 1. The State Hermitage; 2. Ostankino Tower; 3. Lake Baikal; 4. Mount Elbrus; 5. Peterhof; 6. Red Square; 7. The Bolshoi Theatre; 8 The Kremlin.

Task 2. A8, B1, C2, D5, E6, F4

B1

Match the titles 1 — 8 with the texts A — G. There is one odd title.

- 1. Local legends**
- 2. Special in many ways**
- 3. Tourist attraction**
- 4. Diverse wildlife**
- 5. Protection of the ecosystem**
- 6. Extinct species**
- 7. Scientific expeditions**
- 8. Harsh climate**

A. The world's deepest lake, the Baikal, is in Siberia. It is also the largest freshwater lake in Eurasia and the oldest lake on the Earth. At least 1,500 unique species live there - they cannot be found anywhere else on the planet! The water in the lake is so clear that if you drop a coin, it can be clearly seen a hundred feet below the water.

B. People who live in the Baikal region believe that it's a unique and mysterious place. According to them, the water from Lake Baikal can cure different illnesses, gives you strength and clears your mind. They also say that the lake was formed millions of years ago when a huge, hot rock fell to earth. It melted the ice around and that was how Lake Baikal appeared. The story about the meteorite has, however, never been proved by scientists.

C. The lake has also become famous for its unique fish and birds that are not found in other waters. The lake is home to more than 1000 animal species. Among them there are the world's only freshwater seals. There's no evidence of how the seals got to the lake, but they obviously enjoy their life there. Huge brown bears often come to the lake out of the forest to hunt and fish.

D. Though Lake Baikal is located in a very remote place, and is difficult to reach in autumn and winter, it attracts thousands of visitors every year. A chance to see this unique place is worth the long journey! On the banks of Lake Baikal, you can stay in a modern, comfortable hotel, take part in hiking tours and enjoy the untouched natural beauty. People who have visited Lake Baikal once want to return to the place again and again.

E. However, the growing popularity of the lake and the industrial development of the region have caused ecological problems. The safety of this unique natural ecosystem has been discussed at an international level. Now Lake Baikal is on the list of heritage sites protected by UNESCO. A federal state law about the conservation of the lake was also supported in Russia.

F. The lake attracts not only tourists but also many wildlife researchers, biologists and even archaeologists. The world-famous explorer and scientist, Jacques Cousteau, and his team spent lots of time studying the deep waters of Lake Baikal. They also shot a film about their research

that was broadcast by major TV channels all over the world.

G. Everyone considers the Siberian climate very severe, which is perfectly true for the Baikal region. The winters there are really freezing - the average temperature is as low as -25 degrees Celsius. Due to its location in the middle of the continent, the place is characterized by a sharp contrast between winter and summer temperatures. The summers are generally cool, with a few hot days. The sun shines brightly above the lake till late autumn.

Second Career

Jeff Statham: This is my car that I've had for years now, made in Canada. I worked in the automotive industry for about the last 12 or 13 years, a plant in Whitby. We produced the seats for the cars built here in Oshawa. Continuous layoffs - and eventually I got hit by them - and now I'm here. I'm currently in the Second Careers program here at Durham College. I'm in the law and security administration program and my ultimate goal is to become a police officer. It's been great. I love the program.

Ted Dionne (*Instructor, Durham College*): It gives someone like Jeff an opportunity to do something that he may have wanted to do. He probably had it in the back of his mind that he wanted to do something different visualizing what you want to do in the future ...

Jeff Statham: I've wanted to go back to school for years but with shifts it's hard to do. Money is not always there to do it so this Second Careers covers my schooling and it's a perfect opportunity for me.

Jeanette Barrett (*Second Career rep*): The Second Career provides financial support to go back to school to do up to a 2-year program. Our Second Career advisor keeps in touch with them.

Jeff Statham: I've never really had report cards at work worthy of putting on the fridge, but at the end of my first semester I ended up on the dean's list, so now my mother finally has a report card on her fridge.

John Milloy (*Minister of Training, Colleges & Universities*): For workers like Jeff, Second Career is ideal. We have a network of service providers throughout the province called Employment Ontario and they serve as an entry point for anyone who is looking for a job in the province. We work with them to find the best course of action.

Pollution Solutions

Adapted from the "Pollution Solutions" article by L. Prescott, which appeared in Ranger Rick magazine

Air Care

Worldwide, the stinky problem of pollution has grown. More and more factories, cars, and trucks add their bad breath to the air. But the battle against air pollution is also growing. Many U.S. cities still have dirty air. So, most states are making tougher laws against air pollution. And scientists are looking for ways to make factories and cars run cleaner.

Cleaner Rain?

Chemicals called sulfates puff out of coal-burning factories around the world. When the sulfates mix with clouds, acid rain falls and harms lakes, rivers and plants - and the creatures that need them. Also, the wind blows the air around. So, sulfates from one place can fall as acid rain many miles away. The good news is that many countries are working hard to end acid rain. Scientists are figuring out ways to make coal burn more cleanly. And in many parts of North America, the number of sulfates in the air has dropped. So less acid rain is falling!

Dirty Water?

Nearly half of the lakes in North America are polluted. Often, companies dump chemical wastes into water. But scientists are finding a solution to this problem, too. Some rivers have been made much cleaner. And there are big plans to clean up the Great Lakes, the Chesapeake Bay, the Mississippi River, and other bodies of water.

Good Energy News

When we burn coal and oil for energy, we cause pollution. But little by little we're getting more energy from the sun and the wind. This energy is clean and renewable (that means we'll never run out of it). Energy from the sun now helps heat and light more than 100,000 homes in the United States. More good news: many electric companies have discovered that saving energy is better than making more energy. So, they can send experts to homes in the U.S. to look for energy "leaks"-places where energy is being wasted. Everyone needs to have his/her home checked for leaks.

Poisons In Food

Farmers often spray chemicals on crops to protect them against pests. These chemicals are called pesticides. Scientists have found that pesticides often end up in our food. Pesticides can cause health problems - especially for kids. But here's the good news: the U.S. government is helping farmers find ways to protect crops without using many pesticides.

Cleaner Cars

Cars are the world's biggest air polluters. But scientists are trying to invent cars that pollute less. Farmers in Illinois are trying a fuel in their tractors made from soybeans. And there are electric minivans being used in at least six U.S. cities.

Trash

In 1993, each person in the United States threw away about four pounds (1.8 kg) of trash daily. Put it all together and you'd fill 45,000 trash trucks every day! About 1/3 of this waste comes from packaging. But here's a bit of good news. Some companies have begun to use less packaging. And lot of U.S. cities have started recycling projects. In these ways we've begun making less trash. Everyone should look at what they throw away and try to throw away less. So, dear world, you may be covered with dirt and gasping for air. But many people are working hard to fix you, and many kids are rooting for you, too. By the time these kids have grown up, you may do your clean old self again!

Climatic Changes

Climate is a weather a certain place has over a long period of time. Climate has a very important influence on plants, animals and humans and is different in different parts of the world.

But recently the climate has changed a lot, especially in Europe. Scientists think that the reason is **greenhouse effect**. It is caused by **carbon dioxide** (углекислый газ). **Carbon dioxide** is produced when we burn things. Also, people and animals breathe in **oxygen** and breathe out **carbon dioxide**. As you know, trees take this gas from air and produce **oxygen**. But in the last few years people have cut down and burn big areas of rainforest. This means that there are fewer trees and more **carbon dioxide**.

This gas in the atmosphere works like glass in a greenhouse. It lets **heat get in**, but it doesn't let much **heat get out**. So, the atmosphere becomes warmer.

Greenhouse effect is sometimes called **global warming**.

Климатические изменения

Климат - это погода, которая сохраняется в определенном месте в течение длительного периода времени. Климат оказывает очень важное влияние на растения, животных и людей и отличается в разных частях света.

Но в последнее время климат сильно изменился, особенно в Европе. Ученые считают, что причина кроется в парниковом эффекте. Это вызвано углекислым газом (углекислый газ). Углекислый газ образуется, когда мы сжигаем вещи. Также люди и животные вдыхают кислород и выдыхают углекислый газ. Как вы знаете, деревья забирают этот газ из воздуха и производят кислород. Но за последние несколько лет люди вырубали и сожгли большие площади тропических лесов. Это означает, что здесь меньше

деревьев и больше углекислого газа.

Этот газ в атмосфере действует как стекло в теплице. Он пропускает тепло внутрь, но не позволяет большому количеству тепла выходить наружу. Так атмосфера становится теплее.

Парниковый эффект иногда называют глобальным потеплением.

The fires can be divided into two categories. One category is fire incidents which involve only one vehicle without any involvement or influence from other vehicles at ignition. The list of tunnel incidents shows that these kinds of fires develop relatively slowly if there is no other special factor which may accelerate the progress, such as fuel leakage or explosion of cargo. They are initially small and show some sign of fire, such as smoke and flames, so neighbouring vehicles can see what is happening and prepare for the emergency within a reasonable time. The other category is fire incidents which involve more than one vehicle at the start of the fire and occur as a result of traffic incidents such as a collision between vehicles or between a vehicle and the wall of the tunnel. (для A1) These kinds of fires are expected to occur suddenly without any previous signs so they may cause panic in tunnel users and have the potential to develop into a catastrophic fire. In this study, the former category is named "Single fires" and the latter "Collision fires". Among the 69 fires in road tunnels that were analysed, 48 (69.6 %) were single fires and 21 (30.4 %) cases were collision fires. (для A2)

The two categories can be divided into sub-categories depending on whether the fire spreads or not. In this study, fire spread means that the fires propagated to another vehicle which is not engaged in the initial fire.

The reason for focusing on the fire spread is that it is one of the key factors determining the consequences of fires. The spread of fire increases the intensity and size of the fire and hampers the operations of the fire brigade. It also involves more vehicles and tunnel users so it can potentially claim many casualties and economic losses. (для B1)

Sample Answer

Пожары можно разделить на две категории. Одна категория – это пожары, в которых участвует только одно транспортное средство без какого-либо участия или влияния других транспортных средств при возгорании. Перечень происшествий в туннелях показывает, что эти виды пожаров развиваются относительно медленно, если нет других особых факторов, которые могут ускорить развитие, таких как утечка топлива или взрыв груза. Первоначально они небольшие и имеют некоторые признаки пожара, такие как дым и пламя, поэтому соседние автомобили могут видеть, что происходит, и подготовиться к чрезвычайной ситуации в разумные сроки. Другая категория — это пожары, в которых задействовано более одного транспортного средства в начале пожара и которые происходят в результате дорожно-транспортных происшествий, таких как столкновение

между транспортными средствами или между транспортным средством и стеной туннеля. (для А1) Ожидается, что такие пожары возникнут внезапно без каких-либо предшествующих признаков, поэтому они могут вызвать панику у пользователей туннеля и могут перерасти в катастрофический пожар. В данном исследовании первая категория называется «Одиночные пожары», а вторая — «Встречные пожары». Из 69 проанализированных пожаров в автодорожных туннелях 48 (69,6 %) были одиночными, а 21 (30,4 %) — встречными. (для А2)

Две категории можно разделить на подкатегории в зависимости от того, распространяется ли огонь или нет. В этом исследовании распространение огня означает, что огонь распространился на другое транспортное средство, которое не участвовало в первоначальном возгорании.

Причина сосредоточения внимания на распространении огня заключается в том, что он является одним из ключевых факторов, определяющих последствия пожаров. Распространение огня увеличивает интенсивность и размер пожара и затрудняет работу пожарной команды. В нем также задействовано больше транспортных средств и пользователей туннелей, поэтому потенциально он может привести к многочисленным жертвам и экономическим потерям. (для В1)

The study of organizational behavior had its primary origins in industrial and social psychology. Researchers of organizational behavior typically concentrate on individual and group behaviors in organizations, analyzing motivation, work satisfaction, leadership, work-group dynamics, and the attitudes and behaviors of the members of organizations. Organization theory, on the other hand, is based more in sociology. It focuses on topics that concern the organization as a whole, such as organizational environments, goals and effectiveness, strategy and decision making, change and innovation, and structure and design. Some writers treat organizational behavior as a subfield of organization theory. The distinction is primarily a matter of specialization among researchers; it is reflected in the relative emphasis each topic receives in specific textbooks and in divisions of professional associations.

Organization theory and organizational behavior are covered in every reputable, accredited program of business administration, public administration, educational administration, or other form of administration, because they are considered relevant to management.

Sample Answer

Изучение организационного поведения берет свое начало в промышленной и социальной психологии. Исследователи организационного поведения обычно сосредотачиваются на индивидуальном и групповом поведении в организациях, анализируя мотивацию,

удовлетворенность работой, лидерство, динамику рабочей группы, а также отношения и поведение членов организаций. Теория организации, с другой стороны, основана больше на социологии. Основное внимание уделяется темам, которые касаются организации в целом, таким как организационная среда, цели и эффективность, стратегия и принятие решений, изменения и инновации, а также структура и дизайн. Некоторые авторы рассматривают организационное поведение как раздел организационной теории. (для A1) Различие в первую очередь связано со специализацией исследователей; это находит свое отражение в том относительном внимании, которое уделяется каждой теме в конкретных учебниках и в подразделениях профессиональных ассоциаций.

Теория организации и организационное поведение рассматриваются во всех авторитетных, аккредитованных программах делового администрирования, государственного управления, управления образованием или других формах управления, поскольку они считаются относящимися к менеджменту. (для A2) Термин «менеджмент» используется в самых разных смыслах, и изучение этой области включает использование источников, выходящих за рамки типичных академических исследований, таких как правительственные отчеты, книги по прикладному менеджменту и наблюдения практикующих менеджеров за их работой. В то время как многие элементы играют решающую роль в эффективном управлении — финансы, информационные системы, запасы, закупки, производственные процессы и другие, — эта книга сосредоточена на организационном поведении и теории. Sally Campbell is a 32-year-old actress from London, but right now, she's living in Paris in a flat that overlooks the Seine. Sally's mother is French, which means Sally can speak the language perfectly. Sally is very talented. She likes acting in films, but she can also sing and dance brilliantly and she currently has a leading part in a French musical. She can also play the piano very well. In her spare time, Sally likes to relax at home by watching romantic films. She has no plans to return to Britain.

Tom Hammond is from Glasgow, but he lives in New York. He's 18 and he's a music student. Tom can play the piano and the guitar very well. He also writes songs with his friend John. Tom writes the music and John writes the lyrics. When they're happy with a new song, they usually perform it to students at the college. They love to have an audience and would really like to be in a band. When he isn't composing, Tom downloads his favourite music from the Internet.

Hannah Brown is a writer. She's from Manchester, but she lives in Italy. Hannah is 25 and likes writing romantic novels. Her ambition, of course, is to be a published writer, so she writes every day for at least four hours. Her favourite time to write is early in the morning, but she sometimes works late at night too. In the afternoons, Hannah works as a waitress in a café. She doesn't really enjoy this part of her life, but she needs the money to stay in Italy.

Looking for love

Looking for Love is an agency that finds partners for single people of any age. Read about Lisa. My name's Lisa. I'm 25 years old and I'm from Manchester. I'm single and I'm looking for love.

I'm a journalist on a local newspaper, which means I write stories about local issues and sometimes I interview politicians. I like my job, but I'd like to work on a national newspaper one day. That's because I want to have the opportunity to work abroad.

I have a small group of friends who I've known for years. I even went to school with some of them! I'm not really extrovert but I do like going out and having fun. We usually go out to parties, nightclubs, and restaurants. I also like cooking and I make great pasta! My ideal night in is a good meal, a glass of wine, and a DVD. I like thrillers much more than I like romantic comedies!

I'm not very sporty, but I like to keep fit. I stopped smoking last year and now I go running twice a week and I sometimes go to the gym at weekends. I eat lots of fruit and vegetables and I try not to have red meat or too much coffee. At work, I drink water or tea.

I prefer men who are interested in serious issues because I like talking about politics and what's happening in the world. However, I also like men with a good sense of humour. These characteristics are more important to me than physical appearance.

Please contact *Looking for Love* if you think you're the kind of person I'm looking for!

Dear Max,

Well, my family is rather small: my parents and me. My mother Lily works as an engineer at a factory. She's good at drawing. My father Vitaly works as a shop assistant.

I'm not going to choose any of their professions because I'm not good at mathematics. I'm interested in cooking and I'll go to cooking classes. I'd like to have my own restaurant. I sometimes create new things in the kitchen.

Listening script for (task 4)

Last September my boyfriend and I went on holiday to Thailand. It was a disaster. The flight arrived in Bangkok nine hours late. There we were at eleven o'clock at night, and we didn't have anywhere to stay and we didn't know how to get into the city centre. So, we stayed at the airport hotel, which was very comfortable but really expensive.

The next day, we wanted to take a train south to the islands. But we couldn't because we couldn't book any seats. The trains were full. So, in the end, we went by bus and by boat. It was cheaper but it took a lot longer. And when we got to the island we wanted to get to, we couldn't believe it! Where was the sun? It was raining really heavily. And the weather was windy and wet for days. It was awful. We went to restaurants and we went shopping, but we didn't spend any time on the beach. We couldn't sunbathe or go swimming, so we just argued for a week...

We interviewed three people about how family and friends have affected their personalities.

Maria Stanovich

I've always had a strong relationship with my family. An important influence on my personality was my grandmother, Hannah. She was born in 1930 into a poor family with seven children – they had to take very good care of each other in order to survive. Growing up in such difficult conditions had a positive effect on her, teaching her to share everything, be honest, helpful, hard-working, and affectionate. My grandmother taught me all these things, making me realize that family is more important than material possessions.

Katie Dupont

The people around you have the greatest influence on your life – they affect the way you behave and think. As soon as Rob and I met, we connected. When Rob was young, his father died in a motorcycle accident. Being brought up as an only child by a single parent made him independent and ambitious. He left home at 16, and since then has lived in different places and had various jobs. He's taught me that it's important to find time for friends and family and to do what makes you happy. He always has fun, trying new things, keeping his mind and body healthy, and he still

works hard to achieve his goals. I greatly admire Rob and I hope that one day I can look at life in the way that he does.

Jed Mitchell

I spent many hours as a child listening to my uncle Wilson's stories. He was the youngest of 11 children whose family lived in a fishing town in Scotland. Life was hard and with so many mouths to feed, the children began working from an early age. At just 14, my uncle began his first job as a fisherman. That was the beginning of his adventures – he travelled and worked in Alaska, South-East Asia, India, and Africa. He educated himself, learnt to be a chef, an engineer, a farmer, and photographer. Uncle Wilson taught me that life is special and that you should take every opportunity that you can to fill it with adventure.

How I got my dream job

Are you still looking for your dream job? Don't give up. Here's how three people achieved their goals.

Mario Mendes, 29 –

I'm doing something I really enjoy. I'm part of a team that develops new technologies. I work with intelligent, interesting people and occasionally get to travel abroad. I won't pretend it was easy getting my dream job, but it was worth the effort. My advice? Decide exactly what your dream job is and what it involves. Learn about the job. Make contact with companies that could offer your chosen career. Make sure they know your strengths. You may just get that dream job.

Andy Collins, 46 –

As a student, I earned \$295 a week in cash working in a beach café. At the time, it was my dream job! Later I became a chef. It was hard work, I was often in a hot kitchen for twelve hours a day, six days a week. But you have to know the meaning of hard work if you want to achieve your goals. I now own five restaurants around the U.S. My best advice is to find out what your skills and talents are. Talent is something you're born with. Skills are something you've learned to do. People like doing things that come naturally to them, so work and enjoy!

Sarah Cooper, 38 –

I'd been working as a secretary for three years when I decided to change my career. My work was often boring and always busy. I started studying to become a teacher. It certainly wasn't easy; I continued working full-time to pay for my training at night school. I was exhausted most of the time, but after two years, I finally got my qualifications and resigned. I'm now a primary school teacher and it's as good as I imagined. So don't wait! Write a list of the things that are stopping you from getting your dream job. Make a plan to deal with each thing. There's always an answer.

Example: Mario is _____.

A very interesting B self-employed C very happy with his job ✓

1 Mario sometimes _____.

2 Mario thinks he got his dream job because _____.

A he's intelligent B it was easy C he did a lot of preparation

4 When he was a chef, Andy _____.

A earned \$295 a week B didn't enjoy his job C didn't get much time off

5 Andy says it's important to know _____.

A your goals B what you're good at C what you enjoy doing

6 It took Sarah _____ years to train to be a teacher.

The frozen extremes of the earth

The Arctic in the north and the Antarctic in the south are at opposite ends of the planet, but they are similar in many ways. Both are lands of ice and snow, where the temperature in winter can be so low that your skin can freeze in seconds – it can be as low as -80°C . Very few animals are able to survive these conditions, but there are some both in the north and in the south. The Arctic has more plants and animals than the Antarctic, including polar bears, the largest bear in the world. In the south there are no land animals because of the extreme cold, but there are penguins and other sea animals that live on or near the coast – although both in the north and the south the sea is frozen for much of the year.

One difference between the Arctic and the Antarctic is the human population. In parts of the Arctic there are towns and villages. Greenland, for example, the largest island in the world, has a population of 55,000 people. Many of these people work in fishing. They have a difficult life. There aren't many roads between towns and villages, so people travel by snowmobile or with dogs. From November to January, it's dark for 24 hours a day, but from May to July there are 24 hours of daylight.

In the Antarctic there are no normal towns and villages. Only scientists live there all year round, in special buildings called 'stations. They study the sea animals and learn about the history of the world's climate by studying the weather and the ice. It's a hard place to live, especially in winter, but many of them love it there and return again and again.

Example: The Antarctic is the coldest place in the world.

A True B False C Doesn't say V

- 1 There aren't any animals in the Antarctic.
- 2 No people live in the Antarctic.
- 3 There aren't any towns in the Antarctic.
- 4 It is usually -80°C in the Antarctic.
- 5 The sea in the Antarctic is usually frozen.
- 6 There aren't any sea animals in the Arctic.
- 7 In Greenland, people don't work in winter.

- 8 There aren't many roads in Greenland.
- 9 In Greenland in October it's light all the time.

Task 4. Read the text once again. Write the Arctic or the Antarctic.

Example: It's at the South Pole. *the Antarctic*

- 1 Scientists sometimes live here in stations.
- 2 No land animals live here.
- 3 People live here all the time.
- 4 There are more plants here.
- 5 In December it's dark for 24 hours a day.
- 6 There aren't any towns or villages here.

Are sentences 21-27 "Right" (A) or "Wrong" (B)?

David swims the Cook Strait

David Johnson has loved swimming all his life. When he was 27, he swam in a race near the home in the USA. The sea was very cold and David started to feel unwell. He was taken to hospital but he soon got better and started swimming again. In 1983, he became the first person to swim from Santa Cruz Island to the Californian Coast.

In January 2004, at the age of 52, David crossed New Zealand's Cook Strait in 9 hours and 38 minutes. The oldest swimmer before David was only 42 years old. David spent over a year getting ready to swim the Strait. Then, he and his wife flew to New Zealand so that David could practise for a few weeks there. But only days after they arrived, the weather improved so David decided to

start his swim. He did it with the help of a team. “They were great,” David said. “They were in a boat next to me all the time! After a few hours, I thought about stopping but I didn’t and went on swimming.”

Afterwards, David and his wife travelled around New Zealand before returning to the USA.

You can enjoy the rich flavor and delightful aroma of freshly ground coffee beans without having to spend extra money on a coffee grinder simply by using your blender.

Step 1 - Set Up Your Blender

Put your blender on a flat surface on the counter and plug it in. The flat surface is really important so the blender's vibrations do not cause other things to fall off the counter.

Step 2 - Decide how Finely You Need to Grind the Beans

Different kinds of coffee makers require different beans. Medium ground beans work best for a Drip maker. This means that when you pour the ground coffee into your hand, some will stick together, while most will fall away. Espresso Machines tend to do best with medium-fine grounds. In this case most will stick together, but individual grounds can be easily seen. French Press Makers require a more coarse texture so that the grinds do not stick together at all.

Step 3 - Pour Your Coffee Beans into the Blender And Grind Away

Start with a small amount of beans in the blender until you can figure out exactly how much ground coffee your beans will yield. As you have more experience, you will be better able to determine the right amount of coffee beans to put into your blender, but typically, a handful of beans should yield one to two tablespoons of ground coffee

Вы можете наслаждаться богатым вкусом и восхитительным ароматом свежемолотых кофейных зерен, не тратя лишних денег на кофемолку, просто используя блендер.

Шаг 1 — Настройте свой блендер

Положите блендер на плоскую поверхность на столе и подключите его к сети. Плоская поверхность очень важна, чтобы вибрации блендера не приводили к падению других предметов со стола.

Шаг 2. Решите, насколько мелко вам нужно измельчить бобы.

Для разных кофеварок требуются разные зерна. Зерна среднего помола лучше всего подходят для кофеварок капельного типа. Это означает, что, когда вы насыпаете молотый

кофе себе в руку, некоторые из них слипаются, а большая часть отваливается. Эспрессо-машины, как правило, лучше всего работают с зерном среднего помола. В этом случае большинство из них слипнутся, но отдельные частички легко просматриваются. Кофеварки типа френч-пресс требуют более грубой текстуры, чтобы помол не слипался.

Шаг 3. Насыпьте кофейные зерна в блендер и измельчите

Начните с небольшого количества зерен в блендере, пока не сможете точно определить, сколько молотого кофе получится. По мере того, как у вас будет больше опыта, вы сможете лучше определить, сколько кофейных зерен нужно положить в блендер, но, как правило, горсть зерен должна давать от одной до двух столовых ложек молотого кофе.

Pam So, what do you think about Mark? Do you think we should give him the job?

Bob Mmm. I don't know. If he weren't as young as he is, I'd definitely give him a chance, but I don't think he has enough experience.

Pam Neither do I. Although he'd probably be good at it, we need someone who's older.

2

Bob I thought Gemma was someone who has some experience of the job. And she was very open and got on with everybody.

Pam Well, yes, she had great personal qualities, but she hasn't finished her university course or passed any exams yet. I think we should find somebody who's actually finished university.

3

Pam So, do you think Luke is better than the others?

Bob Well, he's older. He used to work for a major company in Italy, but he left that job five years ago and he hasn't worked since. I don't think he's very good and perhaps he'll get bored quickly. I think we need someone who has more recent experience of this sort of job.

4

Bob David might be the person we're looking for. In this job you have to spend a lot of time managing other people and he's good at that.

Pam Well, yes, I agree, although I don't think David's very good at solving problems and, in this job, that's as important as being able to manage.

5

Pam Shall we give the job to Susie, then? She won't be the most experienced person we've ever employed, but she'll work harder than most, that's for sure.

Bob Mmm. But I think we need someone who is more intelligent than Susie. I don't think she's bright enough.

Questions 11–20

If it is correct, **mark A** on your answer sheet.

If it is not correct, **mark B**.

11. The River Wensum flows through East Anglia.
12. People have lived by the River Wensum for at least 2000 years.
13. In the 11th century, Norwich was a small village.
14. Norwich has been a city since its first cathedral was built.
15. Norwich has always been one of the smallest English cities.
16. There are more than 50 churches in Norwich.
17. The number of students in Norwich is increasing.

19. ‘The Castle Mall’ took more than two years to build.
20. Norwich people still like using the old market as well as shopping in ‘The Castle Mall’.

Norwich

Norwich, the capital of the part of Britain known as East Anglia, has existed as a place to live for more than two thousand years. It began as a small village beside the River Wensum. At the time of the Norman invasion in 1066 it had grown to become one of the largest towns in England.

With two cathedrals and a mosque, Norwich has long been a popular centre for various religions. The first cathedral was built in 1095 and has recently celebrated its 900 th anniversary, while Norwich itself had a year of celebration in 1994 to mark the 800 th anniversary of the city receiving a Royal Charter. This allowed it to be called a city and to govern itself independently.

Today, in comparison with places like London or Manchester, Norwich is quite small, with a population of around 150,000, but in the 16 th century Norwich was the second city of England.

It continued to grow for the next 300 years and got richer and richer, becoming famous for having as many churches as there are weeks in the year and as many pubs as there are days in the year.

Nowadays, there are far fewer churches and pubs, but in 1964 the University of East Anglia was built in Norwich. With its fast-growing student population and its success as a modern commercial centre (Norwich is the biggest centre for insurance services outside London), the city now has a wide choice of entertainment: theatres, cinemas, nightclubs, busy cafés, excellent restaurants, and a number of arts and leisure centres. There is also a football team, whose colours are green and yellow. The team is known as 'The Canaries', though nobody can be sure why.

Now the city's attractions include another important development, a modern shopping centre called 'The Castle Mall'. The people of Norwich lived with a very large hole in the middle of their city for over two years, as builders dug up the main car park. Lorries moved nearly a million tons of earth so that the roof of the Mall could become a city centre park, with attractive water pools and hundreds of trees. But the local people are really pleased that the old open market remains, right in the heart of the city and next to the new development. Both areas continue to do good business, proving that Norwich has managed to mix the best of the old and the new.

How To Grind Flaxseed

There are several ways of grinding flaxseeds into powder to get the full health benefit. These include the use of a blender or food processor, a coffee grinder, or manual methods like mortar and pestle.

Each of these ways comes with its uniqueness to grind flax seeds to a powder. This article answers the question by reviewing the best ways to grind flaxseeds.

Can You Grind Flaxseeds in A Blender?

Blenders or food processor is a common kitchen appliance to grind. If you want to grind flaxseeds in a blender or food processor, you will need to add at least a cup of flaxseed into the blender or food processor for it to work properly.

This method takes several minutes as you need to regulate the speed of your blender or food processor, stop, shake, and blend again until your flaxseed is ground to your desired consistency. Using a blender or food processor to grind flaxseed is time-consuming as you have to continue regulating the speed, and grind again to achieve your result.

While using a blender or food processor, care needs to be taken to prevent the flax seeds from turning into paste due to the high quantity of oil present in them.

Как измельчить льняное семя

Есть несколько способов измельчения семян льна в порошок, чтобы получить максимальную пользу для здоровья. К ним относятся использование блендера или кухонного комбайна, кофемолки или ручные методы, такие как ступка и пестик.

Каждый из этих способов имеет свои уникальные особенности измельчения семян льна в порошок. Эта статья отвечает на вопрос, рассматривая лучшие способы измельчения семян льна.

Можно ли измельчить семена льна в блендере?

Блендер или кухонный комбайн — это обычный кухонный прибор для измельчения. Если вы хотите измельчить льняное семя в блендере или кухонном комбайне, вам нужно будет добавить в блендер или кухонный комбайн как минимум чашку льняного семени, чтобы он работал правильно.

Этот метод занимает несколько минут, так как вам нужно отрегулировать скорость блендера или кухонного комбайна, остановить, встряхнуть и снова смешать, пока льняное семя не будет измельчено до желаемой консистенции.

Использование блендера или кухонного комбайна для измельчения льняного семени отнимает много времени, так как вам нужно продолжать регулировать скорость и снова измельчать, чтобы добиться желаемого результата.

При использовании блендера или кухонного комбайна необходимо соблюдать осторожность, чтобы семена льна не превратились в пасту из-за большого количества присутствующего в них масла.

Dear Ann,

Thank you for asking to come and visit you and your family next month. It is a great idea.

I'm really interested in visiting new places. I like museums and old churches very much. I also like visiting art galleries - there are so many fascinating things to see there. I know there is one in your town. Can we visit it? You say that there isn't a sport center in your town but is there a swimming pool? I enjoy swimming a lot and I love diving. Is there also a place to eat fish and chips? Fish and chip shops are great!

The only problem is that I don't know what to take with me: warm shoes, a jumper, boots? What's the weather like in your area? In my town it rains a lot and that's why I always carry an umbrella with me. And what about other things? For example, a camera?

Please send me a leaflet about your town and a street map.

One last question - how old is your sister, Gina? I want to bring her a present. Would she like the new Celine Dion CD?

See you soon!

For questions 21-27, mark A, B or C on the answer sheet.

WORKING FOR AN AIRLINE

Nicola Peet left school at eighteen, went to college and then worked at a local airport. After nine months, she went to work for Saudi Arabian Airlines and then she joined British Airways as an air hostess. Four years later, she got her present job as a manager.

This is what she told us about her job:

“My office is at Heathrow Airport, but I spend 60 % of my time in the air. I teach air hostesses and help them with any problems. I also go to lots of meetings.
My hours are usually from 8 a.m. to 4 p.m. but sometimes I work from 1 p.m. to 9 p.m. At work,
the first thing I do is check plane times on my computer and then I speak with some of the air hostesses.
Sometimes I go on long flights to check how the air hostesses are doing. That's my favourite part

ЕросCam Alternatives

If you're not satisfied with ЕросCam, there are a few other apps that allow you to use your iPhone as a webcam.

1. iCam

iCam is a paid app that can turn an iPhone into a webcam. The mobile app is just one part of the equation; like ЕросCam, you'll also need the iCamSource component on your computer. Once you have both apps installed, you can stream live video and audio from any iOS device.

iCam also works as a security camera; it can send you instant alerts if it detects motion or sound. All motion events are automatically backed up to the cloud. In addition to the original iCam, the company also offers iCam Pro with some additional features.

2. iVCam

iVCam is specifically designed for iPhone owners who have a Windows PC---you cannot use iVCam to stream your iPhone's video output to a Mac.

The app works via WLAN or USB and allows you to connect multiple phones to one computer at the same time. You can stream video in 1080p, 720p, 480p, or 360p resolution. This multi-connection aspect means the software is ideal for anyone who wants to use their old iPhone as a CCTV device, a baby monitor, or a pet cam.

Альтернативы ЭпокКэм (ЕросCam)

Если вас не устраивает ЕросCam, есть несколько других приложений, позволяющих использовать iPhone в качестве веб-камеры.

1. айкам (iCam)

iCam — это платное приложение, которое может превратить iPhone в веб-камеру. Мобильное приложение — это только одна часть уравнения; как и в случае с ЕросCam, вам также понадобится компонент iCamSource на вашем компьютере. После установки обоих приложений вы можете транслировать живое видео и аудио с любого устройства iOS.

iCam также работает как камера безопасности; оно может отправлять вам мгновенные оповещения, если обнаруживает движение или звук. Все движения автоматически сохраняются в облаке. Помимо оригинального iCam, компания также предлагает iCam Pro с некоторыми дополнительными функциями.

2. айвикам (iVCam)

iVCam специально разработан для владельцев iPhone, у которых есть ПК с Windows — вы не можете использовать iVCam для потоковой передачи видео с вашего iPhone на Mac.

Приложение работает через WLAN или USB и позволяет одновременно подключать

несколько телефонов к одному компьютеру. Вы можете транслировать видео в разрешении 1080p, 720p, 480p или 360p. Этот аспект множественного подключения означает, что программное обеспечение идеально подходит для всех, кто хочет использовать свой старый iPhone в качестве устройства видеонаблюдения, радионяни или камеры для домашних животных.

THE ICEHOTEL

For many years the Arctic was a popular destination in the summer season to see the land of the midnight sun but in winter the few inhabitants had the snow and ice to themselves. By the end of the 1980s it was decided that the dark and cold winter should be seen as an advantage. In the winter of 1990, the French artist Jannot Derit was invited to have the opening of an exhibition in a specially built igloo (a building made of snow) in the little town of Jukkasjärvi on the frozen Torne River. The building, named Arctic Hall, attracted many interested visitors to the area. One night a group of foreign guests decided it would be a good idea to sleep in the Arctic Hall. The following morning the brave group were very pleased with their experience and the idea of an ice hotel was born. Today it is world famous.

As soon as winter begins, a team of snow builders, architects and artists from all over the world come to Jukkasjärvi and they make the hotel for that year. As one part is completed, it opens to visitors and overnight guests, while the other parts are still being built. The first part is completed in December and each week after that a new part opens, until January 7th when the hotel is completed. As the ICEHOTEL is built under the open sky, using the natural materials of the winter season, the finishing date depends on nature and therefore there are sometimes changes to the plan. In the spring, as the weather gets warmer, the hotel melts.

Inside the hotel, the temperature is never colder than -5°C to -8°C , however cold it may be outside. Winter outer clothes such as warm overalls, hats and gloves are included in the cost of guests' stay at the hotel. In addition to this, it is a good idea for guests to bring sweaters and a scarf as well as plenty of woolen socks and to choose footwear that is larger than normal to allow space for thick socks.

If you are planning to come to the hotel, you can buy warm sweaters, woolen socks and much more on the ICEHOTEL website. You can order these and the equipment you will need at the same time as you book your visit. The items will be delivered to your room when you check in.

The hotel is in the village of Jukkasjarvi, 200 km above the Arctic Circle but only 15 km from Kiruna airport and 17 km from Kiruna train station. Transport by bus can be arranged from the airport or train station to the IceHotel.
